

Maintenance

Weekly

Using the Pallmann Hardwood Floor Dusting Pad, lightly dust the floor to remove large debris. A vacuum may also be used for large areas. The Pallmann Hardwood Floor Cleaner may be used with the Pallmann Microfiber Pad on a weekly basis or as needed to thoroughly clean your floors. Clean stubborn spots, spills, and shoe marks by spraying the Hardwood Floor Cleaner directly on the areas.

Monthly

Inspect protector pads on furniture and ensure that all walk off mats are in proper locations. Also, visually inspect the wood floor for traffic patterns that may be present. If a traffic pattern is noticeable, it may be time to consult a wood flooring professional to discuss recoating your wood floors.

Yearly

Contact a **professional hardwood flooring contractor** to deep clean your wood floors using the Pallmann Clean Strong product once a year. Over time, accumulation of every day residues such as oils, grease, and dirt will occur on the hardwood floor. These residues will act as an abrasive which may cause premature finish wear. **The Pallmann Clean Strong product is a professional product that should only be used by a professional hardwood flooring contractor.**

Several Years Later

A new coat of finish may need to be applied to your wood floor several years after the initial application. This will ensure that you do not wear down the current finish to bare wood, causing expensive sanding procedures. Compared to re-sanding, re-coating is an inexpensive procedure that often can be completed in one day with little to no dust in the home. We recommend using our dustless recoating products—Pall-X Bond with our Pall-X 96 or Pall-X 98 waterborne finishes.

Who is Pallmann?

Since 1900 Pallmann has been using the latest technology available in the wood floor finish market. Pallmann is consistently striving to produce the next generation of waterborne finishes that meet or exceed environmental standards, in addition to providing the protection homeowners demand for their wood floors. After testing these standards, we then take the manufacturing process one step further. **We combine our German Engineering with American Technical Expertise to give you, the homeowner, and your contractor the very best waterborne finish system for your project.**

115 Years of Quality Innovation

By choosing Pallmann to protect your wood floors, you can be confident that your new finish will look great for years to come. Pallmann's references include providing finishes for projects ranging from grand ballrooms in the French Alps to local coffee shops in Colorado. Our finishes are shipped from our facility in Wurzburg, Germany, and are equipped with 115 years of history and expertise, giving you the assurance and confidence to trust Pallmann on your wood flooring project.

Choosing the Perfect Sealer

Pall-X Color Sealer

Pall-X Color is a single component waterborne sealer that seals raw or stained wood in addition to adding a layer of protection to your floor. Pall-X Color's unique formula reacts with most wood species to bring out the warm rich tones of the wood. This sealer is recommended to enhance the vibrancy and depth of the stain color. (Note: do not use over white or pastel stains.)

Pall-X 325 Sealer

Pall-X 325 is a single component waterborne sealer that seals raw or stained wood in addition to adding a layer of protection to your floor. Pall-X 325 is ideal when a clear, light tone appearance is desired. This sealer is recommended when a white or pastel stain is used prior to application of the final coats of finish.

Choosing the Perfect Finish

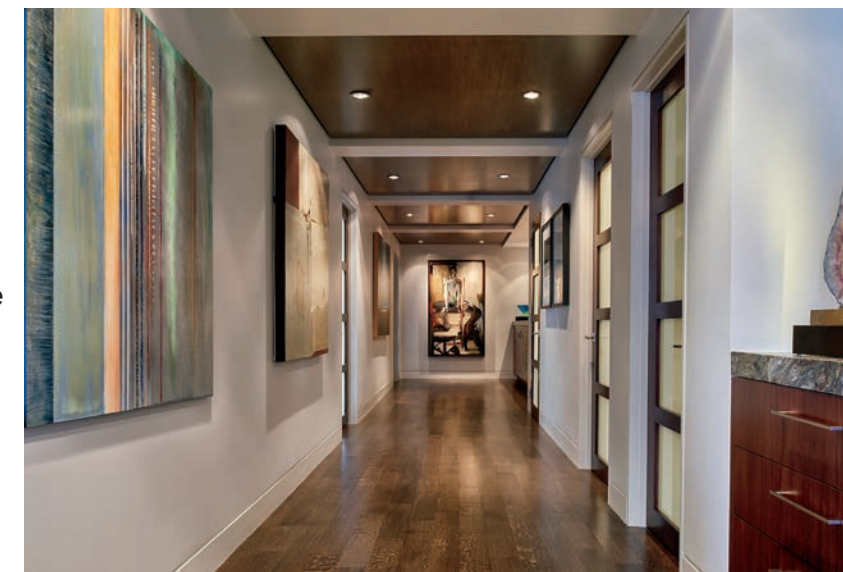

Pall-X 98 Finish

Pall-X 98 is a two component waterborne hardwood floor finish with unmatched durability and chemical resistance. This finish is ideal for commercial and high traffic residential applications. Pall-X 98 is a clear finish that allows the natural beauty of the floor to shine through the finish. It is available in three popular sheens: semi-gloss, satin, and matte. VOC compliant and 100% fully cured in 4 days allows homeowners to become active on their floor quicker than when choosing traditional oil modified polyurethanes.

Pall-X 96 Finish

Pall-X 96 is a single component waterborne hardwood floor finish designed for residential or light commercial applications. This highly durable single component finish has excellent wear, chemical resistance, and the capability to be suitable for many wood flooring projects. Pall-X 96 is a clear finish that allows the natural beauty of the floor to shine through the finish. It is available in four popular sheens: gloss, semi-gloss, satin, and matte. VOC compliant and 100% fully cured in 7-10 days allows homeowners to become active on their floor quicker than when choosing traditional oil modified polyurethanes.
